DISCUSSION/RATIONALE: Lancia Oil Company, Inc. has operated on site as a bulk fuel oil storage and transport facility since approximately January 1971. No. 2 fuel oil has been stored in a 400,000-gallon and an 800,000-gallon AGST. Currently Lancia Oil receives fuel oil via tank truck. In addition to No. 2 fuel oil, kerosene and diesel fuel are stored on site. During an April 27, 1994 NJDEPE/DPFSR, Office of Site Assessment PSA, oil spills and staining were noted in the Fuel Oil Loading Area, the storm water retention area and near several old drums located near the northwest corner of the office building. No further action under CERCLA is recommended due to petroleum exclusion. Further remedial action will be under State authority.
